

Where the Conversion Leaks Are

nomadinternet.com · CRO Recommendations · August 2026

The site's primary conversion mechanism is the coverage check, which appears as the dominant CTA across the homepage and plans pages, but its effectiveness is diluted by multiple competing CTAs and a duplicated plans page that splits the funnel. The most valuable fix is to consolidate the plans pages and streamline the coverage check into a single, unambiguous path, while reinforcing trust signals (testimonials, guarantees, badges) at the decision point to recover lost conversions.

#	Finding	Severity	Effort	PXL
1	Credibility badges not near CTAs Media logos appear only on homepage, not near CTAs on other pages.	Medium	Medium	5/10
2	Weak page metadata Search and social previews are degraded: page title, meta description, Open Graph tags are missing or outside...	Medium	Medium	5/10
3	Duplicate plans pages split funnel Two URLs serve identical plans content, splitting the conversion path and confusing users about which is...	Urgent	Medium	4/10
4	Social proof absent on plans page Plans page lacks testimonials that appear elsewhere, missing trust at decision point.	High	Medium	4/10
5	Coverage check appears twice in funnel Coverage check CTA appears on both homepage and plans page, forcing users to repeat a step.	Medium	Medium	4/10
6	Guarantee signal inconsistent across pages Guarantee heading appears on some pages but not on plans page where commitment is made.	Medium	Low	4/10
7	Inconsistent price formatting across pages Same plans displayed with different price formats, confusing cost comparison.	Medium	Medium	4/10
8	One-time fees shown without context One-time fees listed without explanation, leaving total cost unclear.	Medium	Low	4/10
9	Multiple competing primary CTAs Homepage presents several equally prominent CTAs, making the next step ambiguous.	High	Medium	3/10

#	Finding	Severity	Effort	PXL
10	Images missing alternative text 13 of 125 images carry no alt attribute, losing both assistive technology support and the image-search...	Medium	Low	2/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
